Professional Summary

BCA Graduate with a strong foundation in Object-Oriented Programming, Data Structures, and Algorithms. Technically proficient in full-stack engineering leveraging the MERN stack, Next.js, and REST APIs. Proven experience designing scalable production-grade web applications, managing client-side state, and optimizing relational and non-relational database models for peak system performance in agile environments.

Skills

Languages: C, C++, Java, JavaScript, Python, HTML5, CSS3
Frameworks & Libraries: Next.js, React, Node.js, Express.js, Django, TailwindCSS
Databases & Cloud: MongoDB, MySQL, Vercel Blob Storage, IndexedDB
Developer Tools: Visual Studio Code, Git, GitHub, Google Colab, Figma
Core Competencies: REST API Design, Machine Learning (Scikit-learn), Relational Database Modeling

Education

Graphic Era Hill University — Haldwani, Uttarakhand
Bachelor of Computer Applications (BCA) — CGPA: 8.87 — Graduated: 2026

Vendy Senior Secondary School — Haldwani, Uttarakhand
Senior Secondary (12th, PCM Board) — 2021 – 2022

The Masters School — Haldwani, Uttarakhand
Secondary (10th Board) — 2019 – 2020

Experience

YuvaIntern — Junior ReactJS Developer Intern — Jul 2026 – Aug 2026

- Developed highly responsive user interfaces and implemented front-end application logic using ReactJS, reducing page load times by 20%.
- Collaborated with cross-functional development teams to translate UI/UX wireframes into functional code, delivering over 15 scalable components.
- Optimized web application performance and modularized the codebase, decreasing code redundancy by 30% (Certificate ID: YI/2026/123676/314153).

Projects

MedPredict — Django, Python, Scikit-learn, Pandas, Google Gemini AI — Oct 2025 – Dec 2025

- Engineered an AI-powered disease prediction system employing a Random Forest Classifier to analyze user symptoms with high accuracy.
- Integrated Google Gemini 2.5 Flash API to power an interactive AI doctor chat and generate personalized smart health reports.
- Developed a robust Django backend to process medical datasets using Pandas and NumPy, ensuring seamless data flow to responsive front-end interfaces.

TenKay — Next.js, TypeScript, MongoDB, Mongoose, Tailwind CSS — Jan 2026 – May 2026

- Engineered a high-performance full-stack service marketplace powered by the Next.js App Router to connect consumers with workers.
- Architected secure, role-based pipelines supporting specialized Customer, Worker, and Admin views with asynchronous fetching.
- Implemented geographical location discovery, real-time tracking systems, and secure 6-digit PIN verification.

CodeSnippets — Next.js, React, Node.js, Express, MongoDB, Tailwind CSS — Dec 2024 – Jul 2025

- Led a development team in building a software sharing workspace optimized for managing and indexing reusable codebase items.
- Designed logical MongoDB schemas and developed modular REST endpoints in Node.js for authentication and CRUD handling.
- Built responsive UI elements using Tailwind CSS, implementing responsive layouts and user reputation tracking.

Additional Information

Professional Certifications: "Full Stack Web Development" (GeeksforGeeks), "Introduction to Python" (Udemy)

Spoken Languages: English (Professional), Hindi (Native)

Technical Focus: Web System Architectures, Algorithm Optimization, Clean Code Principles, Continuous Learning
